Objectives of my work

Arranging changes to enduring success for the companies in the long run. The main focus is on the improvement and on enduring long-dated changes, not on streamlining at short notice. Conducting companies until the successful implementation of concepts by the execution of result-oriented project work.

What decorates me

- expeditious and significant analysis of complex issues and problems
- implementation-oriented and targeted project work
- flexibility and expeditious coverage of changes
- practical orientation in place of bureaucracy and over-regulation
- inspiring others, persuading, advancing and requiring them
- respect in the association with people

These are my topics

- Quality Management in the 21st century
- implementing praxis-oriented project management
- introducing innovational management, using innovation scouts in an effective way in the company
- TRIZ (theory of inventive problem solving))
- utilizing Change Management capabilities
- Management Systems
- Total Quality Management
- Process-oriented management systems
- Lean Management principles and programs
- Six Sigma, Lean Sigma
